Introduction

Saturn is the great timekeeper of astrology, its 30-year cycle slowly marking out the creation and completion of the physical form. In esoteric astrology time is said to stop at the age of thirty when Saturn completes its first cycle and turns to repeating itself. From thirty years onward it is said that we begin moving beyond the grasp of time into eternity. It is said that the first thirty years we spend building our personal space capsule, the physical body. At any rate, Saturn is a key planet to note in our birth chart.

What follows amounts to a brief overview of the first thirty years or so of your life -- a road map of the years to come. Since childhood, adolescence, and early adult life are so crucial to each of us, an attempt has been made to describe these formative years from an astrological perspective. Based on the gradual movement of the planet Saturn, this is one of the most tested of all astrological techniques. It is used by almost every professional astrologer as part of any personal consultation. Provided that your time of birth is more or less accurate, you will find this information both accurate and informative. Here is a general life overview, followed by a close-up on your current changes -- what is happening right now. First the overview:

Dates and (Age)
on Angles

This configuration points to your being a very active and outgoing youngster, especially in your teenage years. For example, you may show a pronounced interest in the outside world and social life relatively early, say around eleven or twelve years of age. At that time you may move very rapidly into the limelight and find yourself a group leader and quite successful in all social activities in the public.

In social areas, things will just naturally work out for you. This trend will continue and reach a peak when you are about eighteen or nineteen years of age, after which time you will gradually lose interest in the social and external, and begin to turn more inward. This could result in your being somewhat of a prodigy, achieving very early career success, only to find yourself less and less involved in it all. You may even turn away from everything you have put together to that point, and choose to start over again to find a

new vocation, one that is more inward or spiritual. From that time, you may discover yourself spending many years pursuing this more inward and subjective path, and this could last until you are thirty years of age (or more), at which time you will turn outward once again and take a new direction.

Recap: while perhaps not an infant prodigy, you will be very socially active in your teens, even reaching public (and certainly social or group) recognition. This rise to prominence will reach a peak around the age of eighteen, after which the whole social thing will somehow lose its luster, and you will turn away from the outer world, and become more interested in what is happening within, your inner life. Your whole career orientation may shift as you enter this more inward period, which will last until you are around thirty-five years old, after which you will again come into a much more outward and public time.

02nd Saturn Cycle
Dates and (Age)
on Angles

In the second Saturn cycle we are each born free from the grip of time. Our physical body is complete; we have reached our prime, sustain for a while, and then gradually decline. And although our physical body has ceased to grow, our mind continues to expand beyond those physical limits. In a very real sense, we are all born again, but this time the birth is spiritual not physical.

It is during this second Saturn cycle that we learn to control ourselves mentally (and emotionally), manage our lives, and build a career. It is during this time that we are in our majority that success in any endeavor is

most possible. In the inner teachings it is said that we spend our second thirty years repairing the damage we made (without realizing it) emerging from our first thirty years.

This second cycle of Saturn is the most opportune for physical success as all roads lead up to us from youth and away from us in old age. We stand at the crossroads, the pinnacle or prime of life and can see both ways.

3rd Cycle

In this third and (for most of us) final Saturn cycle our physical form is definitely in decline but our spiritual horizons only continue to broaden. It is said in the esoteric tradition that in this cycle we can experience becoming an active part of the creative force in life itself, not just conceptually, but actually. We are able to work with those younger than we to shape and direct their activities. Although we begin to retire from the physical scene, inside we never age but are as young as we can remember.

It is during this time that any mental training, patience, and self-control really pay off. We are now very much

the fruit of our own discipline and experience; it is during this time that we are very much out of the body more and more of the time. If we have no discipline we are somewhat at the mercy of the winds of change, but whatever control and mastery we have achieved now works with and for us to complete our life. We can feel very creative and part of the creative forces that are all around us.

Saturn Transits IC - May 10, 2025, Sep 17, 2025, Feb 02, 2026

The dates as the bottom angle point to the end of a period of about seven years during which you may have been very inward and self-absorbed -- quiet, subjective years. Information that you have been examining and thinking about will now begin to take shape and prove useful to you. This next period is one of action and embarking on new projects. You will feel more and more confident and outgoing, a sense of confidence that grows stronger with each passing day. Things that may have been in suspended animation for many years will now precipitate and take on structure and shape. These next years are ones in which you should plan to work hard to bring out and give shape to the ideas you have pored over these last 6-7 years. You are beginning to really move forward now and can expect rewards to take an outward career, and social form within a few years. A growing self-confidence. In summary, from this time forward, expect a more confident, outgoing attitude, for you have brought to a close a time of inward examination and learning. A growing sense of direction and self-worth will find you reaching out and establishing yourself.

Reality Visions

Saturn Conjunct Neptune Transit to Natal

This is a long-term aspect about ideas and insights into separating our dreams from reality, somehow putting our ideals to the test. It is about compassion, but compassion with discipline.

Ideas of Authority

Saturn Conjunct Sun Transit to Natal

Your practical and organizational skills are at their clearest. Perhaps more of an internal change than one that is flashy and outward, this shift in emphasis marks your moving out of the past, out of whatever obligations and responsibilities you have to do, and onto a future of greater control and mastery on your part. In other words, you will be better able to handle things, to exert control over your own affairs, and direct your future than you have up to now. This is the beginning of a more future-oriented time.

Conclusion

This concludes your Life Landscape Report, the chronological movement of Saturn (the sequence of time) through your natal chart.

Most astrologers would agree that the 30-year cycle of Saturn through the astrological houses and specifically the □Angles, □(Ascendant, I.C., Descendant, and Midheaven) represents one of the most accurate and telling of all astrological factors.

Saturn signifies the physical form as it emerges through time after birth, reaches our □Prime, □and then begins to fade. This is usually divided into three cycles of thirty years each.

I like to think of the first thirty years, while Saturn is building our physical body and form, as the time when we each build ourselves a space capsule as well as we can, as solidly as possible □our body.

Then after the age of thirty, we are launched into outer space. Time as we knew it ends and we begin the next Saturn cycle and are born beyond time. My teacher told me that in that second cycle we each repair the damage we made during the first cycle and during the process of being launched.

And finally, in our third 30-year cycle, it was explained to me that we can consciously and actively participate in the creative life force, literally shaping life in those younger than ourselves. I hope you have enjoyed your report.
