### Introduction

Your Vedic Astrology Report consists of 4 sections: an interpretation of the Moon nakshatra and Moon sign, an analysis of yogas, a third section that describes various specific astrological influences in your chart, and an appendix of technical details. Fortunately, you do NOT need to be an astrologer or know what a "Moon nakshatra" is to read this report! If you are an astrologer or student of astrology, the astrological details are described as well, and you can easily skip over these technical astrological details if they do not interest you.

In this report there are quotations from the following books:

"Yogas In Astrology" by Dr. K S Charak, 1999, published by UMA Publications, 72 Gagan Vihat, Delhi-110 051, India

"Three Hundred Important Combinations" by B.V. Raman, 1997, published by Motilal Banarsidass Publishers Private Limited, Delhi, India

"Constellational Astrology" by Robert De Luce, 1963, De Luce Publishing Company, Los Angeles, CA, USA

If you are interested in learning Vedic astrology, we highly recommend these 3 books. Only small sections that are relevant to a particular astrological influence have

been quoted from these books. These works are based on the ancient Vedic writings (the Vedas) and have been elaborated upon and explained in terms that make sense for modern people. "Constellational Astrology" is no longer in print, but the other two books can be purchased.

**Important: The interpretations in this report are based on the ancient system of Vedic astrology. Many of these interpretations are fatalistic and some are even extreme, frightening, and are now known to be not literally correct! You should interpret the influences described here in more psychological and general terms. Do not take the statements given in this report literally! The extreme and definite interpretations in this report should be viewed as indicating psychological tendencies rather than absolute facts. Also, modern astrologers believe that there is a negative and a positive potential in any astrological influence. Even the most difficult astrological influence can be handled successfully, and an astrological influence that might seem beneficial can be mishandled. Astrologers do claim to be able to describe the important issues and themes in your life, but what is good or bad is mostly up to you.**

## **Section I: The Moons Nakshatras and Rasi**

Nakshatras are also known as lunar mansions. There are 27 nakshatras, and each one has a length of 13 degrees and 20 minutes. The nakshatra position of the Moon is very important in Vedic astrology. Given below is the meaning of the Moon's nakshatra and Moon sign (rasi) in your chart.

### *Moon in 3rd nakshatra:*

The Moon is in Krithika, the third nakshatra (26 deg 40 min of Aries to 10 deg of Taurus). Most likely you are a heavy eater, fond of the society of matrons, and others may have suspicions about your moral conduct. You are brilliant and may be famous.

### *Moon is in Aries rasi:*

According to De Luce: "The native will have round, voluptuous eyes; will relish vegetables and spicy foods, but will eat moderately. He will be of quick temper but soon mollified, will always be on his legs (untiring energy), and interested in sex. Will be weak-kneed (changeable), and have no permanent wealth of his own. Will be fond of fighting and of women, and clever in serving others. Will have disfigured nails and a wounded head (rash and argumentative, with consequent results). Will be proud and best among his brothers (must be first); will have lines in his palm the shape of a weapon, known as sakti, and be afraid of the water (fear of emotional ardor being dampened or rebuffed)."

## Section II: Yogas

You may be familiar with the word "yoga" as referring to various physical exercises and postures. ## APPENDIX

Vedic astrology is an ancient system of astrological analysis practiced by many thousands of astrologers over the centuries. Vedic astrology, like modern western astrology, has not been validated scientifically, and you should think critically about the information provided to see if it appears to be accurate and relevant. No astrological information should be blindly believed in. Astrology simply lacks the scientific proof that established sciences have. On the other hand, many people have found astrology to be useful and helpful.
