Introduction

Your astrological horoscope (natal chart) at birth is an important key to your personality and character, but your natal chart is not the last word about you. As time moves on after the moment of your birth, the Sun, Moon, and planets continue to circle through the heavens forming ever-changing kaleidoscopic patterns in relation to your own birth chart, bringing out or obscuring this or that part of you.

It can be useful to know how these ongoing planetary patterns relate to your life, and that is what this report is about. Here we calculate the primary astrological changes in your chart and interpret them so that you can see at a glance what is happening at any given time. Your events are arranged and interpreted chronologically, by well-known astrologer Michael Erlewine, and each event includes date and time, keywords, astrological indicator, and an astro-tarot card. We hope you enjoy your forecast.

In the tradition of astrology the planets have always been interpreted separately from the Sun and the Moon, which are called "The Lights," and for good reason. They literally light up our life and their combined interaction describes the essence of what is happening to us at any given time. Although called "The Moon Report," any mention of the Moon automatically involves the Sun, and of course, our Earth. These three, the Sun, Moon, and Earth, in their endless interaction are perhaps the single most important factor to observe in astrology.

The ever-changing relationship in the sky between the Sun and the Moon is perhaps most obvious at the Full Moon, but as we know, it is going on all the time. This report tracks the Sun-Moon relationship as it relates to your particular natal horoscope and birth chart, detailing all of the major events that take place in the current month for a specific life area and planet.

The Moon has always represented the 'mother', meaning anything that nurtures or cares for us, our support system, however that is made up. It also indicates our emotional makeup, how we feel about things, and the nostalgia of the past - where we came from.

On the other hand, the Sun represents the 'father' principle and the future, where we are heading toward and, to some degree, the means we have to get there. The Sun burns brightly, while the Moon is cool and comforting. The two together mark the endless play between the past and the future, and we here on Earth, are caught right in the middle, that is: the present.

Your Pluto Forecast

Pluto stands for true transformation, experiences that touch us so deeply, make us feel so vulnerable, that we are somehow changed forever. This planet is also not noted for being gentle and subtle, but rather sudden and dramatic. A Pluto experience is seldom forgotten and often marks a pivot or turning point in our lives.

This forecast is about how the planet Pluto figures in your natal chart and what it portends for the immediate future. In this calendar will be marked the days and times when we can work with the force of changes, as well as those when we will be better off waiting for another time. We hope you enjoy it.

Pluto in your Natal Chart

Pluto in your Natal Chart

Before we present your Pluto forecast for the coming months, let's review how the planet Pluto is configured in your natal or birth chart. What follows is an interpretation of Pluto at your birth to the Sun, Moon, and other planets. It should help to give you a general idea of how you related to matters of vulnerability and transformation. Here goes:

Pluto Opposite Moon
(Waning)
193°10'

The Experience

At best, you have a tendency to experience how deep your emotions can run, perhaps rattling a few skeletons in your closet. At worst, this can lead to emotionally harrowing times, complete with volcano-like eruptions from your past and white-knuckle hanging on.

Pluto Trine Sun
(Waning)
254°20'

Conserve Change

Understanding just how you have changed and/or how much that change amounts to or means is part of your character. To you, life is a dawning awareness of what you have been through, and you may enjoy sharing this information with others.

Pluto Square Mercury
(Waning)
269°59'

Public Impact

You will have times in life, during which you may find yourself examining an experience, digging deeply into potentially sensitive areas of the psyche, looking for problems and ways to protect and conserve.

Pluto Sextile Venus
(Waning)
299°14'

Nitty-Gritty

You can be compulsively analytical, whether that be psychologically or just digging into the heart of some situation, and getting down to the nitty-gritty. In any case, you enjoy getting at what is important, and exposing what is not.

Pluto Square Mars

(Waning)
256°29'

Power Partners

Your ambitions or drive for power, and the use of force, are more than apparent (to you), and you have the ability to be more discriminating (and conservative) in how you pursue your goals. You understand how to use force and are conservative in that direction.

Pluto Semisextile Jupiter

(Waxing)
028°28'

Strategic Ideas

Your career plans, the path to success, which for you could mean to power and/or politics, inevitably are worked into plans that you intend to carry out.

Pluto Conjunct Saturn

(Waxing)
012°38'

Transforming Ideas

At times your mind is like a crucible, with strong thoughts, and perhaps extraordinary effort, perhaps vering on cruelty at times. You may tend to force change.

Pluto Trine Uranus

(Waxing)
109°46'

Accumulating

You have a natural ability at finding times to incorporate or embody the new depth psychology concepts, ones involving deep and penetrating insights into spirituality and the mind.

Pluto Sextile Neptune

(Waxing)
057°00'

Change Blocked

You may have experiences of deep acceptance, of a more spiritual nature, that dawn on you, but these can meet with all kinds of minor resistance that prevents or delays it from really getting across and being understood. Working through the resistance furthers.

Your Pluto Forecast

Now that we have reviewed how Pluto is configured at your birth, let's get to the heart of this report, a forecast as to how Pluto (matters of change and transformation) will play out in the coming months. These are the actual transits that will occur between the Sun, Moon, and other planets in relations to Pluto, laid out in an easy-to-read calendar-like format.

Each event will be described by date, day of the week, and include an interpretation written by astrologer Michael Erlewine about how that event might appear in your life. This includes a brief keyword description, when you can expect this event to be exact, the astrological jargon professional astrologers can read, and even a little tarot-like card image to jump-start your imagination.

By reading through the activity of Pluto forecast in the coming months, you basically have a roadmap of how this planet will manifest its nature and play out in your life. We hope you enjoy your forecast.
